**Cordo, P.** Controversies in Neuroscience II: Neural Transplantation: Introduction **iii**

**Neuwelt, E. A., Pagel, M. A., Geller, A. & Muldoon, L. L.** Gene replacement therapy in the central nervous system: Viral vector-mediated therapy of global neurodegenerative disease **1**

**Sinden, J. D., Hodges, H. & Gray, J. A.** Neural transplantation and recovery of cognitive function **10**

**Stein, D. G. & Glasier, M. M.** Some practical and theoretical issues concerning fetal brain tissue grafts as therapy for brain dysfunctions **36**

**Open Peer Commentary**

**Anderson, B., Chatterjee, A. & Graham, G.** Neural transplants are grey matters 46

**Baisden, R. H.** Therapeutic uses for neural grafts: Progress slowed but not abandoned 47

**Blount, J. B., Kondoh, T., Pundt, L. L., Conrad, J., Jansen, E. M. & Low, W. C.** Immunobiology of neural transplants and functional incorporation of grafted dopamine neurons 48

**Bond, N. W.** Repairing the brain: Trophic factor or transplant? 49

**Cassel, J-C. & Will, B.** The structure, operation, and functionality of intracerebral grafts 51

**Chiang, L., Flores, E. P., Wen, D. Y., Hall, W. A. & Low, W. C.** Gene therapy for neurodegenerative disorders and malignant brain tumors 52

**Crutcher, K. A.** The ethics of fetal tissue grafting should be considered along with the science 53

**Davidson, B. L.** The limitations of central nervous system directed gene transfer 54

**Davis, H. P. & Volpe, B. T.** Building a rational foundation for neural transplantation 55

**Dunnett, S. B.** Multiple potential mechanisms of graft action is not a new idea 56

**Dunnett, S. B. & Torres, E. M.** Elegant studies of transplant-derived repair of cognitive performance 57

**Felten, D. L.** Transplantation, plasticity, and the aging host 58

**Freed, W. J. & Smith, T. D.** Principles of brain tissue engineering 58

**Haring, J. H.** Therapeutic neural transplantation: Boon or boondoggle? 60

**Li, Y. J. & Low, W. C.** Intraretrosplenial grafts of cholinergic neurons and spatial memory function 61

**Lynch, M. P.** Neural transplantation, cognitive aging, and speech 62

**Moffett, S. B.** Lessons on transplant survival from a successful model system 63

**Mufson, E. J. & Sobreviela, T.** The NGF superfamily of neurotrophins: Potential treatment for Alzheimer's and Parkinson's disease 63

**Nieto-Sampedro, M.** CNS transplant utility may survive even their hasty clinical application 65

**Privat, A. & Giménez y Ribotta, M.** The spinal cord as an alternative model for nerve tissue graft 65

**Ridley, R. M.** Thinking about repairing thinking 67

**Sanders, D. A.** Multiple obstacles to gene therapy in the brain 67

**Schallert, T.** Models of neurological defects and defects in neurological models 68

**Seigel, G. M.** Gene replacement therapy in the CNS: A view from the retina 69

**Silver, R. & LeSauter, J.** Studying restoration of brain function with fetal tissue grafts: Optimal models 70

**Stanfield, B. B.** Difficulties inherent in the restoration of dynamically reactive brain systems 71

**Steece-Collier, K.** Neural grafting in human disease versus animal models: Cautionary notes 71

**Strata, P. & Rossi, F.** Pathway rewiring with neural transplantation 73

**Svendsen, C. N. & Dunnett, S. B.** Gene therapy and neural grafting: Keeping the message switched on 73

**Werth, R.** Will brain tissue grafts become an important therapy to restore visual function in cerebrally blind patients? 74

**Woodruff, M. L.** Behavioral effects of neural grafts: Action still in search of a mechanism 75

**Authors' Responses**

**Muldoon, L. L. & Neuwelt, E. A.** Local and global gene therapy in the central nervous system 76

**Sinden, J. D., Hodges, H. & Gray, J. A.** Grafts and the art of mind's reconstruction 79

**Stein, D. G. & Glasier, M. M.** Are fetal brain tissue grafts necessary for the treatment of brain damage? 86

**Rachlin, H.** Self-control: Beyond commitment **109**

**Open Peer Commentary**

**Baum, W. M.** Patterns yes, agency no 122
**Baumeister, R. F.** Transcendence, guilt, and self-control 122
**Branch, M. N.** When is a pattern a pattern? 123
**Eisenberger, R.** Does behaviorism explain self-control? 125
